Aldfe Valley Academy Covid-19 Addendum to School Behaviour Protocol

Our expectations and rationale behind our existing behaviour policy remain. In addition, please note the following:

1. It is the expectation that no member of the school community will deliberately contravene health and safety measures in place to safeguard the health of members of the school community during the Covid-19 crisis and until further notice.
2. The school reserves the right to take measures to keep members of the community safe, including restricting the movement of students to certain areas at short notice at social times and restricting access to certain parts of the school building. Parents and carers will be contacted to remove their child from the school site if they do not comply with expectations. If any student does not comply with these restrictions, we will impose sanctions.
3. Any student who wilfully refuses to comply with the health and safety provisions in school or who deliberately puts others at risk, for example by spitting or by coughing on others, or deliberately refusing to maintain social distancing, will be excluded from attending this provision.
4. Any student who does not follow the health and safety instructions and expectations of social distancing on buses, both in regard to drivers and other passengers, will have their right to travel suspended for a fixed period or until these conditions no longer exist.
